To Whom It May Concern

Letter in support of Prof. Li Gang's Teaching Activities and Contribution.

I have known Prof Li Gang as a colleague in the Department of Orthopaedics & Traumatology and also in my capacity as Co-ordinator of the Panel on Musculoskeletal System under the Faculty of Medicine.

Prof. Li has made a solid contribution towards the department's curriculum development especially on the integration of basic science teaching relevant to Orthopaedics and Traumatology.

He has also been a key contributor towards the development of the curriculum on the Musculoskeletal System which is taught currently in Years 1-3 of the faculty's curriculum.

Li Gang is a passionate teacher and has also contributed towards E-learning courses. Indeed he has been an innovator and his flash-based course on Osteoporosis is exceptionally well received.

Li Gang has kept himself abreast with the latest educational technologies and has participated in mainland-Hong Kong collaborations on teaching and teaching development.

I would like to state that Prof. Li's CTE scores may not reflect his teaching competence and capabilities, indeed he is an excellent teacher and on par with the proficiency and standards expected at his level.

Prof SM Kumta
Assistant Dean (Education), Faculty of Medicine,
Professor, Department of Orthopaedics & Traumatology
